Github: <https://github.com/Crazyhacker777>

Mobile: +91 7710612573

SKILLS

Languages: Python, Java, JavaScript, SQL

Tools/Platforms: Git, GitHub, VS Code, MySQL, PostgreSQL, MongoDB, FastAPI, Flask, Django, Cisco Packet Tracer

Soft Skills: Artificial Intelligence & Machine Learning, Cybersecurity, Full-Stack Development, IoT

PROJECTS

CureConnect | React, Vite, Node.js, Express.js, MySQL

Present

- Developing a full-stack clinic management web application for digital management of appointments, patient records, prescriptions, billing, reports, and user dashboards.
- Building the frontend with React and Vite and planning backend integration using Node.js, Express.js, and MySQL.
- Designed the project around a practical clinic workflow, including separate patient, doctor, and receptionist functionality.

Smart Pipeline Leak Localizer | ESP32, Arduino, Flow Sensors, Relay, OLED/LCD, RTC, MicroSD

Present

- Developed an IoT-based pipeline monitoring system that compares flow measurements at multiple points to identify possible water leakage.
- Implemented automatic pump/valve shutdown logic using an ESP32, relay module, and flow sensors when abnormal flow conditions are detected.
- Integrated display, real-time clock, buzzer, and data-logging components for monitoring and timestamped event recording.

Campus Super-App | FastAPI, MySQL, React

Project

- Conceptualized a centralized campus platform intended to bring multiple student services and campus functions together in one application.
- Exploring backend architecture with FastAPI and database design using MySQL.
- In4Verse Hackathon Project | HTML, CSS, JavaScript Hackathon

Built a frontend-focused website during my first B.Tech hackathon using HTML, CSS, and JavaScript..

TRAINING

Self-Directed Technical Learning

Present

Current focus: Artificial Intelligence & Machine Learning, cybersecurity, React, backend development, Git/GitHub, and full-stack development.

- Practicing software development through hands-on projects and technical experimentation.
- Building familiarity with web development, databases, IoT systems, and networking tools.

Continuously strengthening programming and problem-solving skills through project-based learning

CERTIFICATES

Leadership Fundamentals MOOC

Greek for Greeks

HiDays

EDUCATION

Lovely Professional University

Phagwara, Punjab

Bachelor of Technology — Computer Science and Engineering (Artificial Intelligence & Machine Learning)

Currently Pursuing

Computer Science and Engineering; CGPA: 8.34

Pathseekers School

PCM; Percentage: 72%

Percentage: 91%
